Overview
George Mason University VPN allows you to connect to Mason networks as if you were on campus, making access to restricted services possible. To connect to the VPN from your Mac computer, you need to use the Cisco AnyConnect client.

Using Cisco AnyConnect on Macs
1. From the Finder, open Cisco AnyConnect by clicking the Go Menu > Applications > Cisco > Cisco AnyConnect Secure Mobility Client.

2. If the server is blank, put in vpn.gmu.edu.

3. Click Connect.

5. Click **OK** to start the connection.

**Disconnect from the Mason VPN**

1. In the Dock, click the **Cisco AnyConnect icon** with a small lock.

2. At the prompt, click **Disconnect**.

3. Disconnect from the VPN.
