

## Overview

George Mason University VPN allows you to connect to Mason networks as if you were on campus, making access to restricted services possible. To connect to the VPN from your Windows computer, you need to install the Cisco AnyConnect VPN client.

## If Your Computer is on MESA

1. Open **Software Center** by clicking the **Start button > All Programs > Microsoft System Center 2012 > Configuration Manager > Software Center**.

2. Check the **Cisco AnyConnect VPN** and click **Install**.

A screenshot of the Microsoft System Center 2012 Software Center interface. The window title is 'Software Center' and the user is 'adl7010'. The interface has tabs for 'Available Software', 'Installation Status', 'Installed Software', and 'Options'. The 'Available Software' tab is active. Below the tabs, there is a search bar and a 'SHOW' dropdown menu. A table lists available software applications. The 'Cisco AnyConnect VPN Client' is highlighted with a red circle. Below the table, there is a detailed view for the 'Cisco AnyConnect VPN Client', including its status, requirements, and description. The 'INSTALL' button is circled in red at the bottom right of the detailed view.
